

Metrohm Certified Installation

Confidence in Quality with Certified Installation

Metrohm Certified Installation

02

Why choose Metrohm Certified Installation?

Metrohm Certified Installation provides a compact documentation package to ensure correct setup and functionality of your system in accordance with the supplier's specifications. If you work in an environment where quality aspects matter, this is the right installation option for you.

Metrohm Certified Installation documents all necessary steps to demonstrate:

- Correct installation of all hardware and software components.
- Error free start-up of your system.
- Operational check to verify that the system performs as designed.

Your benefits at a glance

With Metrohm Certified Installation you can be assured that:

- The system is set up correctly, tested and ready for use.
- You receive documented proof of correct system functionality that satisfies your quality assurance needs.
- All procedures are performed by trained and certified personnel.

Documented Installation Process

Following a structured procedure, your analytical system is unpacked, checked and set up by a certified Metrohm employee. All information relevant to defining the system configuration and assuring correct operation is documented in detail.

The serial numbers of the system components, software license data, and important information that has an impact on correct functionality is all recorded. All activities and findings of the installation are documented in detail:

- Environmental conditions to verify workplace suitability
- Computer specifications to ensure software compatibility
- Connectivity plan of all components to ensure setup reproducibility

Verification of correct functionality

To complete a successful installation, the correct functionality of the whole system is verified by performing a short test based on a standard operational procedure (SOP). The findings are assessed and documented in a functional test protocol.

With this final and documented proof of correct functionality, you can be confident that your system meets all of Metrohm's specifications and the results produced are trustworthy.

Documented Quality – Metrohm Certified Installation

With Metrohm Certified Installation you receive an extensive documentation package that covers all aspects of the installation process and verification of the functionality.

Additional documents included in this package cover important quality assurance aspects such as:

- Delivery notes
- Quality certificates of components
- Metrohm employee qualification
- Standard certificates
- Traceability of test equipment
